

Hands on : Create a Spring Web Project using Maven

SpringLearnApplication.java

```
package com.cognizant.spring_learn;

import org.slf4j.Logger;
import org.slf4j.LoggerFactory;
import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;

@SpringBootApplication
public class SpringLearnApplication {

    private static final Logger LOGGER =
        LoggerFactory.getLogger(SpringLearnApplication.class);

    public static void main(String[] args) {

        LOGGER.info("START");

        SpringApplication.run(SpringLearnApplication.class, args);

        LOGGER.info("END");
    }
}
```

pom.xml

```
<?xml version="1.0" encoding="UTF-8"?>
<project xmlns="http://maven.apache.org/POM/4.0.0"
xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
    xsi:schemaLocation="http://maven.apache.org/POM/4.0.0
https://maven.apache.org/xsd/maven-4.0.0.xsd">
    <modelVersion>4.0.0</modelVersion>
    <parent>
        <groupId>org.springframework.boot</groupId>
        <artifactId>spring-boot-starter-parent</artifactId>
        <version>4.1.0</version>
```

```
<relativePath/> <!-- lookup parent from repository -->
</parent>
<groupId>com.cognizant</groupId>
<artifactId>spring-learn</artifactId>
<version>0.0.1-SNAPSHOT</version>
<name/>
<description/>
<url/>
<licenses>
  <license/>
</licenses>
<developers>
  <developer/>
</developers>
<scm>
  <connection/>
  <developerConnection/>
  <tag/>
  <url/>
</scm>
<properties>
  <java.version>17</java.version>
</properties>
<dependencies>
  <dependency>
    <groupId>org.springframework.boot</groupId>
    <artifactId>spring-boot-starter-webmvc</artifactId>
  </dependency>

  <dependency>
    <groupId>org.springframework.boot</groupId>
    <artifactId>spring-boot-devtools</artifactId>
    <scope>runtime</scope>
    <optional>true</optional>
  </dependency>
  <dependency>
    <groupId>org.springframework.boot</groupId>
    <artifactId>spring-boot-starter-webmvc-test</artifactId>
    <scope>test</scope>
  </dependency>
</dependencies>
```

```

<build>
  <plugins>
    <plugin>
      <groupId>org.springframework.boot</groupId>
      <artifactId>spring-boot-maven-plugin</artifactId>
    </plugin>
  </plugins>
</build>

```

```

</project>

```

The screenshot shows the Spring Initializr web application interface. The browser address bar displays 'start.spring.io'. The page features a sidebar with a hamburger menu and a clock icon. The main content area is divided into several sections:

- Project:** Includes radio buttons for 'Gradle - Groovy', 'Gradle - Kotlin', and 'Maven' (selected).
- Language:** Includes radio buttons for 'Java' (selected), 'Kotlin', and 'Groovy'.
- Spring Boot:** Includes radio buttons for '4.1.1 (SNAPSHOT)', '4.1.0' (selected), '4.0.8 (SNAPSHOT)', and '4.0.7'. A '3.5.16' option is also present.
- Project Metadata:** Includes input fields for 'Group' (com.cognizant), 'Artifact' (spring-learn), and 'Package name' (com.cognizant.spring-learn).
- Packaging:** Includes radio buttons for 'Jar' (selected) and 'War'.
- Configuration:** Includes radio buttons for 'Properties' (selected) and 'YAML'.
- Java:** Includes radio buttons for '26', '25', '21', and '17' (selected).
- Dependencies:** Includes a button 'ADD DEPENDENCIES... CTRL + B'. Below this, there are two sections:
 - Spring Web:** Labeled 'WEB', with a description: 'Build web, including RESTful, applications using Spring MVC. Uses Apache Tomcat as the default embedded container.'
 - Spring Boot DevTools:** Labeled 'DEVELOPER TOOLS', with a description: 'Provides fast application restarts, LiveReload, and configurations for enhanced development experience.'

At the bottom of the page, there are three buttons: 'GENERATE CTRL + G', 'EXPLORE CTRL + SPACE', and an ellipsis button '...'.
