

Hello World RESTful Web Service

HelloController.java

```
package com.cognizant.spring_learn.controller;

import org.slf4j.Logger;
import org.slf4j.LoggerFactory;
import org.springframework.web.bind.annotation.GetMapping;
import org.springframework.web.bind.annotation.RestController;

@RestController
public class HelloController {

    private static final Logger LOGGER =
        LoggerFactory.getLogger(HelloController.class);

    @GetMapping("/hello")
    public String sayHello() {

        LOGGER.info("START");

        String message = "Hello World!!";

        LOGGER.info("END");

        return message;
    }
}
```

application.properties

```
spring.application.name=spring-learn
logging.level.com.cognizant.spring_learn=DEBUG
server.port=8083
```

SpringLearnApplication.java

```
package com.cognizant.spring_learn;
```

```
import org.slf4j.Logger;
import org.slf4j.LoggerFactory;
import org.springframework.boot.SpringApplication;
import org.springframework.boot.autoconfigure.SpringBootApplication;
import org.springframework.context.ApplicationContext;
import org.springframework.context.support.ClassPathXmlApplicationContext;
```

```
@SpringBootApplication
```

```
public class SpringLearnApplication {
```

```
    private static final Logger LOGGER =
        LoggerFactory.getLogger(SpringLearnApplication.class);
```

```
    public static void main(String[] args) {
```

```
        LOGGER.info("START");
```

```
        SpringApplication.run(SpringLearnApplication.class, args);
```

```
        //displayCountry();
```

```
        LOGGER.info("END");
```

```
    }
```

```
    public static void displayCountry() {
```

```
        ApplicationContext context =
            new ClassPathXmlApplicationContext("country.xml");
```

```
        Country country =
            context.getBean("country", Country.class);
```

```
        LOGGER.debug("Country : {}", country);
```

```
        ((ClassPathXmlApplicationContext) context).close();
```

```
    }
```

```
}
```

The screenshot shows an IDE with the following components:

- Project Explorer:** Shows the project structure with folders like `src`, `main`, and `java`. The `java` folder contains `com.cognizant.spring_learn` and `controller`.
- Code Editor:** Displays the `SpringLearnApplication.java` file. The code is as follows:

```
10 @SpringBootApplication
11 public class SpringLearnApplication {
12
13     private static final Logger LOGGER = 3 usages
14         LoggerFactory.getLogger(SpringLearnApplication.class);
15
16     public static void main(String[] args) {
17
18         LOGGER.info("START");
19
20         SpringApplication.run(SpringLearnApplication.class, args);
21     }
22 }
```
- Run Console:** Shows the output of the application. It starts with a ASCII art logo and then displays the following logs:

```
2026-07-05T13:18:55.157+05:30 INFO 21592 --- [spring-learn] [ restartedMain] c.c.spring_learn.SpringLearnApplication : Starting SpringLearnApplication using Java 26.0.1 with
